An evolution of research on raw materials that results in a change of consistency in the body mixes and more uniform compositions, including in cross-section of the carving produced with digital technology, guaranteeing naturalness and aesthetic appeal in the most restrictive specifications.

This tiles are produced by pressing mixtures of naturally coloured raw materials with the inclusion of micro-pebbles, grits and chips that match the colour and structure of the product's surface.

**Designs that bring a revolution.**

# azuro onyx

**Decor Azuro Onyx Purple**

The background image shows a wall with a complex, carved pattern of overlapping leaves and branches. The pattern is rendered in a light, neutral tone against a darker background. In the upper right corner, there is a stack of five books with various spines, and a round, woven basket with a lattice-like pattern. The overall aesthetic is classic and textured.
