C O L L E C T I O N

Syncstone is a revolutionary technology in the ceramic tile industry that produces tiles that closely resemble natural elements. It is achieved by passing the tiles through two digital machines that are synchronized with each other and use **Quick Response (QR) technology**. The result is the tiles, such as natural stone, wood, and cement, texture appearance, and surface that are incredibly realistic feeling. Finally, the tile looks like functional and decorative surfaces that simulate both sight and touch.

< **DIGITALLY PRINTED
FULLBODY TILES**

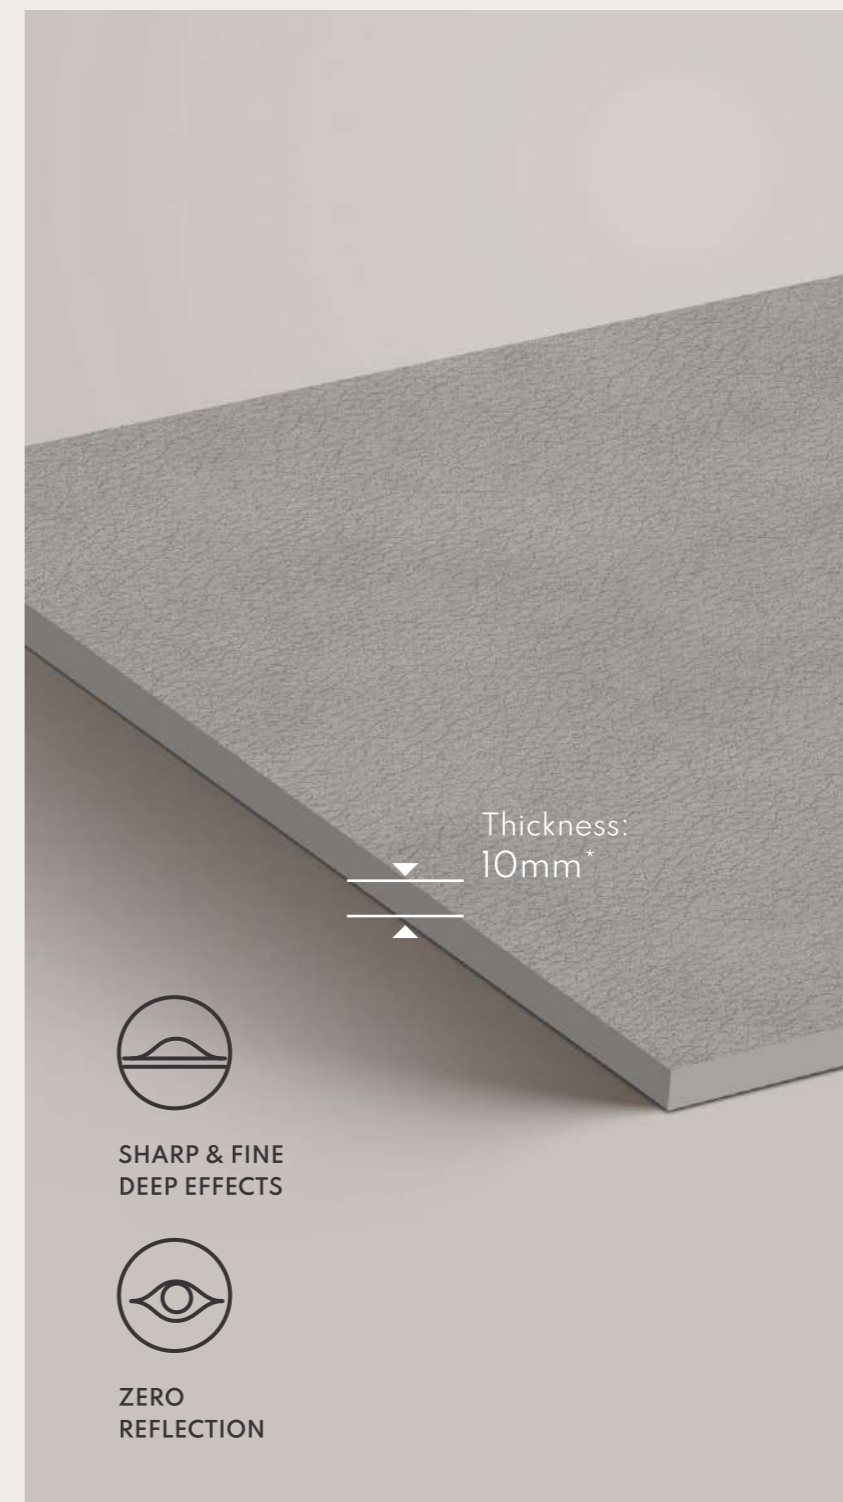

A surface revolution, the exclusive and first in the industry, the SyncStone Collection is digitally printed fullbody tiles with cutting-edge 3D technology.

^ **FULLBODY
TILES**

The SyncStone Collection comes with the reliability of Mozart's fullbody strength which stands the test of time, load, traffic, use, and more effortlessly.
